

## SLOT WHEEL AND SPEED SENSOR:

# Module Circuit Diagram

## About this item

- 1.the use of imported groove coupler sensor, slot width 5mm.
- 2.output status indicator lamp output high, output low lights.
- 3.block, output high; no shelter, output low.
- 4.the comparator output signal clean, good waveform, driving ability, than 15mA.
- 5.the working voltage of 3.3V-5V
